

# Ideas for my Master Thesis

Gregor Steiner

02/28/2022

## Idea

Exploit the 2021 heatwave on the North American west coast

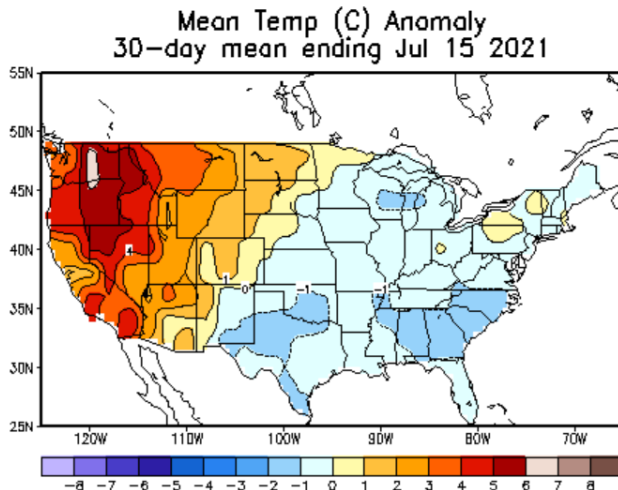

Figure 1: Temperature Anomalies in June/July 2021

## Data for outcome

- ▶ Sick leave data:
  - ▶ Monthly data from the Current Population Survey (CPS), but county is often missing
- ▶ Commuting data:
  - ▶ American Community Survey (ACS) or Longitudinal Employer-Household Dynamics (LEHD), but only yearly
  - ▶ Maybe fuel consumption could be an alternative? That is available monthly from the EIA, but only for PADD regions
- ▶ Crime Data:
  - ▶ Data of all recorded incidents ( $> 5$  Mill.) in a given year is available [here](#) or [here](#). This includes the exact date and state and county numbers, but 2021 is not yet available.
